

Website Goals and Plan Documentation

My primary goal for the website is to create an engaging and user-friendly platform that serves a specific purpose or content niche. I aim to implement the principles learned from W3Schools to ensure a solid foundation for the site's structure and functionality.

Goals:

1. Learning Goals

- Apply HTML and CSS concepts from W3School.
- Gain hands-on experience in web development.
- Understand responsive design principles.

2. Website Goals

- Create visually appealing and user-friendly interface.
- Prioritize ease of navigation for seamless interaction.

3. Content Goals

- Clearly define target audience and tailor content accordingly.
- Provide valuable information and services.
- Maintain a consistent and engaging tone.

4. Interactive Elements

- Incorporate interactivity features like forms, buttons, and slides for user engagement.

Section and Features:

1. Homepage

- Introduction to the website's purpose and offerings.

2. Sections

- About: Brief background on the website
- Content: Detailed information or offerings.
- Contact: Form or information for user interaction.

3. Design

- Choose a color scheme and typography that aligns with the website theme.
